Updates for Boldron

Boldron

It's go, go, go this year in Boldron! As you know, at the end of last year, our leased line provider successfully installed their connection to Boldron's cabinet. Residents may have seen our team when they visited in December to finalise this connection by installing the cabinet's active equipment. This highly anticipated line is the key to completing Boldron's future-proofed full fibre network.

To ensure the network is in tip-top connection in time for home connections our engineers were also in the area finishing off the scheduled maintenance works. We're now awaiting some final test results before we can begin home connections. Once we've got all the green lights, residents with a contract will receive a call from our team to schedule their installation appointment. We expect to start this process in the first quarter of the year.

Thank you for your ongoing patience throughout this project. Our team is just excited as you all are for full fibre connectivity to be available in Boldron. We will continue to progress the network maintenance and will be in touch to discuss next steps as soon as we can!
