

THE BUILD BULLETIN

Updates for York

Escrick

This month we have even more exciting news for Escrick! Since our last bulletin, we have been connecting customers to our full fibre network.

The installation team have thoroughly enjoyed beginning the installation process in Escrick and, from all accounts, our new customers are thrilled with their ultrafast service.

If you live on Skipworth Road, Dower Chase or Dower Park, your connection is now live! If you're interested in futureproofing your broadband and phone line, please contact our Sales team to discuss which of our competitive packages will best suit your lifestyle (sales@fusionfibregroup.co.uk or 0333 305 7560).

The completion of the network is being held up by a few wayleave negotiations and permit restrictions. However, our build partners will progress works where possible to bring properties into service. We're currently forecasting for the network to be complete by the end of April.

If you've got a contract signed, our installation team will be in touch as soon as your local network is live. We can not wait to extend this service to the rest of the community, providing a fibre connection which will service generations to come with ultrareliable, ultrafast broadband.

Stockton on the Forest

We're pleased to report, there's been more good news for Stockton on the Forest this month! In the past week, we heard from our leased line providers that the backhaul installation was completed, and their tests have returned positive results.

This fantastic, albeit long awaited, news is exactly what we wanted to hear! On Monday 26 February, our Tech Team visited Stockton on the Forest to install the active equipment in the cabinet. Since then, we have ticked off the final piece of testing to triple-check the correct speeds and bandwidth are achievable before home connections begin.

Most properties on the following streets are now ready for service! If you've got a contract signed and you live here, please sit tight. Our team will shortly be in touch to book your installation (if they've not already contacted you). All going to plan, connections will begin in the coming fortnight. 🎉

NB: Not all properties in these postcodes will be live. If your postcode is also in the 'remaining works' table, some properties in your postcode are yet not yet live.

As mentioned in the last bulletin, our Stockton on the Forest network is largely complete. 356 out of 494 premises are built, tested and live! There are a few areas which are still being held up by wayleave negotiations and a defective pole which Openreach are planning to replace in April.

Thankfully, we've made major headway with some of the wayleaves required to complete the build this year, which means we can now progress works that were previously on hold. The below table will indicate if either of these dependencies affects your postcode.

Remaining works

Dependency	Streets associated	Forecasted time until connections
<p>Openreach Defective pole.</p> <p>This pole was meant to be replaced in February but has now been pushed back until April.</p>	<p>SANDY LANE Y032 9UU SANDY LANE Y032 9UT SANDY LANE Y032 9WB SANDY LANE Y032 9UR THE VILLAGE Y032 9UP THE VILLAGE Y032 9UW</p>	<p>Dependant on the successful removal of the defective pole.</p>
<p>We are waiting for a wayleave negotiations to be finalised in this area before the build can continue.</p>	<p>THE VILLAGE Y032 9UP</p>	<p>Dependant on how quickly negotiations are progressed with the land owners</p>
<p>A wayleave we were waiting for has now been finalised.</p> <p>We will now progress network building and testing.</p>	<p>BAR LANE Y032 9XS BARR LANE Y032 9TS SANDY LANE Y032 9US SANDY LANE Y032 9UR SANDY LANE Y032 9UT SANDY LANE Y032 9UU</p>	<p>1-2 months</p>

If your postcode falls under multiple categories, it is because properties in your postcode are affected by one or more of these dependencies. If you've got a signed contract, our installations team will call to book you in as soon as you are live.

If you're interested in a connection to broadband which is built for the future, please get in contact with Regional Sales Manager, Ian. His direct number is 07761 800 188, you may also email any questions for Ian to sales@fusionfibregroup.co.uk
