

THE BUILD BULLETIN

Updates for Boldron

We're pleased to say that many Boldron customers are now experiencing the joy of full fibre connectivity. Connections began with properties with an overhead connection, while the team worked on clearing customer lead ins to enable the underground connections. With a large majority of these ground works now complete, most Boldron customers are booked in for an installation appointment, if not connected already.

Customers who've signed a contract will have been contacted regarding their installation. However, some appointments may be on hold due to wayleave negotiations or planning permission. We are working with residents and the local council to progress these as quickly as possible.

This will be the final Build Bulletin update for Boldron. Thank you for your patience throughout this journey to full fibre connectivity. We're very appreciative of your enthusiasm and support. Our team very much look forward to serving the Boldron community with full fibre broadband for generations to come!

If you're unsure about when your property will be connected, please contact our team via email (sales@fusionfibregroup.co.uk) or call 0333 305 7560.
