

THE BUILD BULLETIN

STOCKSFIELD AND MICKLEY

Over the past few weeks, we've been slowly releasing small handfuls of properties onto the live network, allowing for more home connections throughout the village. Over 800 properties across the two villages now have access to future-proof full fibre broadband.

In June you may have noticed works pick up throughout Stocksfield, as we make major headway preparing the next area to go live. We're just about ready to release the next large group, containing 330 properties. To coincide with this release, we will be holding another community event. This will give you the opportunity to talk one-on-one with our team about how this fibre upgrade can improve your everyday. More details of this free event are to come.

Those with signed contracts in this area, might spot our FTTP installation team proving their lead-ins. This means they're checking the line-of-site, or underground ducts, between the network and your house so that your installation appointment is as seamless as possible.

Once your lead-in has been surveyed and your property is released onto the live network, Hannah or Elle from our installations team will contact you with available times for your installation appointment.

If you're yet to be sign up, it's not too late. Please contact the Northumberland team directly on their new landline: 01914067153.

NEXT AREAS TO GO LIVE:

NE43 7PQ	APPERLEY ROAD
NE43 7PG	APPERLEY ROAD
NE43 7PE	APPERLEY ROAD
NE43 7PD	APPERLEY ROAD
NE43 7EW	BIRKdene

There's still work to be done, but we are proud of the quality of work which has been produced this year. The team will continue to work consistently to deliver your network, as efficiently as possible. Thank you for your patience and cooperation as we work to bring full fibre connectivity to Stocksfield and Mickley

Please note, due to the nature of fibre networks, not all properties on the above streets will be made live.
