

THE BUILD BULLETIN

STOCKSFIELD AND MICKLEY

Over 1,100 Stocksfield and Mickley properties now have access to full fibre broadband. To celebrate this milestone our team are hosting a drop-in session at Stocksfield Community Centre on 11 Sept from 1:00pm to 7:00pm. All are welcome to come along and discuss your broadband, or landline needs – with no obligation to sign up!

Those with contacts signed in the recently released areas may spot our installation team 'proving' their lead-ins. This means they're double checking the line-of-sight, or underground ducts, between the core network and your house to ensure your installation appointment is as seamless as possible. Following this survey, we'll reach out to book your installation appointment.

In the meantime, our build team is continuing to complete the last legs of the network. There is still a fair amount of work to complete, however, we are committed to completing the network without compromising on quality.

Want a fibre connection? It's not too late. Please contact the Northumberland team directly on their new landline: 01914067153. Or, sign-up independently online in less than five minutes: <https://fusionfibregroup.co.uk/coverage-postcode-checker/>
